

Visiting professorships

In order to encourage collaboration between excellent senior scientists in Denmark and international peers, leaders of Danish biomedical research groups can apply for funding to invite foreign guest researchers at the professor level to Denmark for 2-6 months.

Criteria:

- The project must be within neuroscience or field with potential benefit for neuroscience.
- The applicant must be a research leader at a Danish non-commercial research institution, who wishes to invite an international colleague to Denmark.
- The duration of the visiting professor's stay in Denmark must be between 2-6 months.

The evaluation/rating of applications will be based on:

- The scientific quality of the proposed project (originality, state of the art, impact and feasibility)
- The scientific qualifications of the candidate
- The scientific competences and facilities of the host environment
- The feasibility of the collaborative project suggested in the application
- The benefit for Danish research

How much:

You can apply for up to DKK 500.000 per grant for a period of two to six months.

Application

The application must include an explanation of the visiting professor's scientific qualifications including:

- Research plan for the stay in Denmark
- Publication list and CV
- Budget
- Justification of how he/she will strengthen research at the applying institution/department.

The application form should be filled out by biomedical research leaders at Danish universities/university hospitals and submitted via the Foundation's electronic application system. Applications will be processed within 3-4 weeks.
